## Be a Part of History

BF Tower

The museum is at the exhibit phase for the BF Tower. We have an interpretive plan to design and install the exhibits to demonstrate the function.

- The Tower Operator
- The Signal Maintainer
- Directing Traffic
- Train Orders
- Signals
- Operating Signals and Switches for Railroad Safety

Bradford was a unique town being formed and developed by the railroad.

Bradford's BF Tower was the last active railroad structure in operation.

Pulling the levers will give an authentic experience of moving the traffic through the junction.

\$25,000 from the State of Ohio toward the project needs to be matched.

You can help the museum qualify for the funds by contributing to the local match of \$130,000.

The funds are only available for a 2 year period. It is imperative to raise the funds. The tower will be transformed into an educational experience for area youth and adults.
